(54) Title: DISK STORAGE CONTAINER

(57) **Abstract:** A storage container for at least one readable and/or writable data disk (D) having a ferro-magnetic hub (H) in its centre. The container comprises at least one panel (1) having a surface (2) for accommodating the disk. The surface includes magnetic material (4) in a position to enable alignment of the disk hub therewith for holding said disk adjacent to the surface. The surface (2) comprises guiding a centring member (3) which positioned about the magnetic material (4) so as to surround the disk (D) at least partially when in stored position adjacent said surface. The invention enables a convenient storage and removal of the disk with low risk of damaging the disk.
